Pulmoconnect: Your Gateway to Excellence in Pulmonology Education

Postgraduate medical education often lacks integration between academic learning and real-world clinical practice, limiting exposure to practical decision-making and guideline-based care. Modern learning must encourage collaboration, networking, and immersive experiences.

PulmoConnect bridges this gap through a phygital academic network across 50 medical colleges, delivering curated, guideline-aligned content and structured sessions designed not only to deepen understanding of respiratory medicine but also to assist students in structured exam preparation. The program aims to create a future-ready academic ecosystem for pulmonary medicine.

Don't miss this exclusive opportunity to connect, learn and transform the approach to learning in pulmonology.
